

Dementia Care Queensland
NDIS DEMENTIA SPECIALIST

Queensland's only dementia-specialist NDIS provider.

When you refer a person living with dementia, you want to know they
land somewhere built for exactly that. That is all we do.

The problem we solve

Most NDIS providers manage twenty or more conditions, and their coordinators carry hundreds of clients across every category. Dementia, which is progressive and behaviourally complex, becomes an afterthought, and the learning happens on the patient's time.

The pattern is familiar: a generalist provider accepts the person, hits the complexity, an incident follows, and the placement ends. Each ending is a clinical event. Lost familiarity, carer burnout, medication escalation, an ED presentation.

We exist to break that cycle. Dementia is the only thing we do.

What we offer

Specialist Support Coordination

Guiding participants and families through the NDIS and every stage of the dementia journey, with proactive plan management as function declines.

Home Care

Specialist dementia support delivered in the person's own home.

SIL Houses

Supported independent living homes designed around the cognitive and sensory needs of people living with dementia.

WHO WE SUPPORT

NDIS participants living with dementia, with particular strength in younger onset dementia (under 65), the group with an NDIS pathway. This includes Alzheimer's disease, vascular dementia, Lewy body dementia, frontotemporal dementia, Huntington's disease, posterior cortical atrophy, Korsakoff syndrome, and other acquired neurological conditions with a dementia component.

Why refer to us

Specialist, only.

Every coordinator holds specialist dementia training. Every support worker is selected and trained for dementia. Every SIL house is designed for it. When you refer to us, you are not hoping they will figure it out. They already have.

We plan ahead, not reactively.

Our coordinators understand disease progression and build supports that anticipate change, reducing crisis, carer breakdown and provider failure.

We work both systems.

For under 65 patients the NDIS and aged care crossover is genuinely complex. We work it daily.

We keep you in the loop.

Confirmation of contact, an intake summary on commencement, updates on request, and a direct line to the Referrals Coordinator.

How to refer

1

Contact

Send a referral through our form, or call us. A couple of lines with a name and best contact is enough to start.

2

Intake

We respond within one business day and begin intake.

3

Connect

The participant and family are contacted within 48 hours.

4

Kept in the loop

You get confirmation and an intake summary, and can ask for progress any time.
